

# 多摩川 360° ツアー

The Tama River 360° Tour

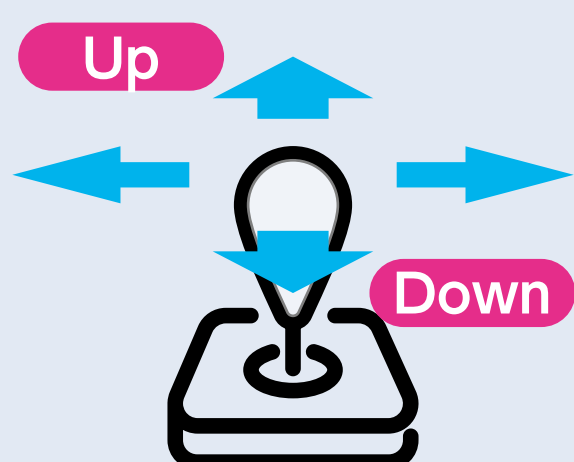

## Tama River 360-Degree Tour

Travel down through the Tama River, from its headwaters to its lower reaches.

Use the lever in front of you to change your viewpoint, and look at all the different wildlife!

How  
to  
Use

### How to Use the 360° Underwater Video

#### Headwaters

The beautiful streams in the Mitake Gorge and Akigawa Gorge are home to wildlife that lives in clean water.

What creatures can we see?

Sweetfish, char, fluvial sculpin, cherry salmon, etc.

cherry salmon

Sweetfish

#### Middle basin

There are houses and other buildings by the river. The river is wide now, and flows more slowly. We can see quite a lot of wildlife, and there are some introduced species here as well.

What creatures can we see?

Big-scaled redbfin, Japanese eel, pale chub, smallmouth bass (introduced species), etc.

pale chub

smallmouth bass

#### Lower reaches

This area is noted for how at high tide seawater from Tokyo Bay mixes with the river water.

What creatures can we see?

Red stingray, blackhead seabream, Japanese sea bass, flathead grey mullet, yellowfin goby, Japanese mitten crab, etc.
