

いもものどっち!?  
**在 外**  
**東京外来種クイズ**

**Quiz on Tokyo's Introduced Wildlife**

Some of the most familiar wildlife around you might just be non-native!

See if you can guess which of the wildlife you see next are \*native and which are introduced!

Note: Native species are those that always lived in a given region.

How to Use

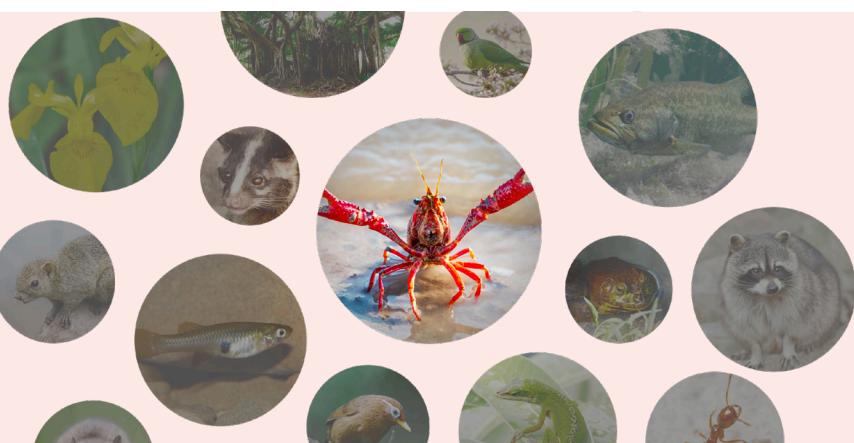

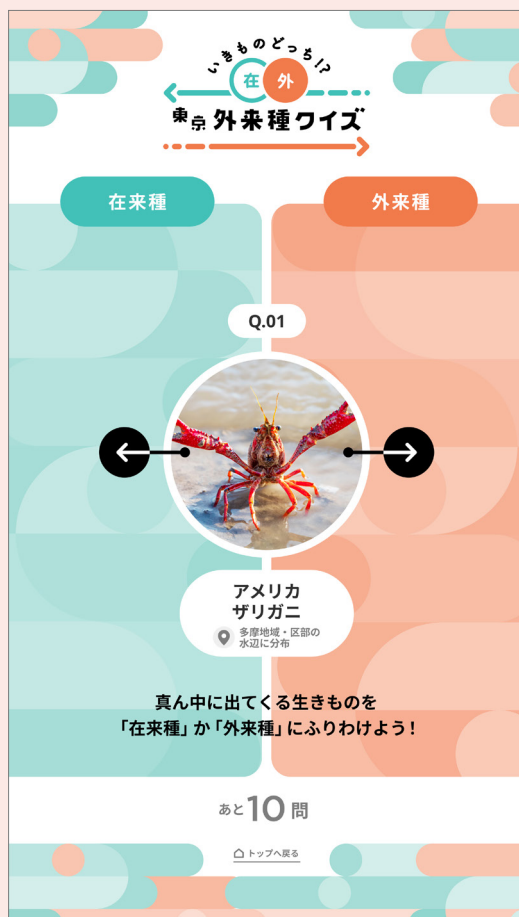

**Sort out wildlife into native and introduced species**

There are a total of 10 questions

The plant or animal will be shown in the middle.

If it's native, swipe left.  
 If it's introduced, swipe right.

The right answers will be shown once you've done them all.

**What is an introduced species?**

These are species that have been brought by humans from other parts of the country, or from other parts of the world, to places where they did not live before. They can cause major issues such as destroying the existing ecosystem.
